

Face masks dispenser for aircraft cabin/lavatory

COVID-19 forces people all over the world to follow certain rules. A face mask helps to prevent an infection of COVID-19. So having a fresh mask available supports to feel comfortable in the actual environment and is a signal of “we take care”. We have developed the **world's first aircraft mask dispenser** for multi-purpose installation in the aircraft cabin. Simple and easy to implement.

Product features

- Fully certified aerospace materials meeting requirements of FAR 25.853 (flame, smoke, tox)
- Antimicrobial surface paint possible, e.g. ALEXIT FST BioProtect, AIC 02.16
- Surface and color can be customized according to cabin design (also logo customization or message printed on top surface possible)
- Installation by screw and insert or Velcro loop/hook, tape to any cabin surface due to low weight
- Delivery with CoC or EASA Form 1 (aircraft installation SB)
- Face masks are individual packed and clean before use, no contamination during removal of single item by PAX
- Spare masks can be supplied for refill by interiorsDIRECT
- Weight is ~85g / EA (empty)
- Dimensions
 - 185 x 80 x 60mm (15 masks)

Benefits

- ✓ Supports cabin comfort during COVID-19 phase
- ✓ Easy to install/remove by several fixing options
- ✓ Full certification service available incl. EO, minor change and ICA data.
- ✓ Low investment & short lead-time
- ✓ Customization possible for use in 1st Class, Business, Eco Class or VIP.
