

Variable mid seat table

COVID-19 forces airlines to install measures to make sure the PAX is feeling comfortable in the aircraft. Distancing in the cabin is a main topic and keeping the middle/neighbor seat free is one action. We offer a flexible mid seat table that can be installed to make a use of the free space and also offer additional comfort to the PAX.

Product features

- Light weight table element to install by seat belt
- Variable use as removal or installation takes seconds by use of seat belt
- Table top provides space and comfort to passenger
- Additional service as option for airlines to generate income or provide additional service
- All colors and materials of leather cover possible
- Stiff foam structure to ensure long lasting use and savings
- All materials used are cabin qualified materials according to FAR/JAR Part 25 (EASA CS.25.853)
- Full certification possible
- Logo customization possible

Benefits

- ✓ Airlines income generation or passenger comfort increase
- ✓ Easy to install and integrate to cabin > maximum flexibility as table can be stored in cabin
- ✓ Light weight of component
- ✓ Customization of colors and materials possible
- ✓ Spare supply from stock
