

Antimicrobial toilet seat/cover/shroud for Airbus

Hygiene factors play an important role for passengers sense of comfort. Especially in the lavatory bacteria are not visible but highly existent, so that any action to reduce bacteria is helpful.

Antimicrobial toilet seat/cover/shroud

- Antimicrobial surface was implemented with A350
- Now available also for A320/A330/A380
- Increasing passenger comfort
- Placard possible
- All Airbus colors available

e.g.: SACV11603 or
SACV11604 with applied
antimicrobial topcoat

Details:

- Airbus toilet seat/cover with applied antimicrobial topcoat
- Interchangeable to all Airbus toilet seats/covers/shroud
- Antimicrobial ALEXIT PureGuard topcoat:
 - Highly efficient against a broad range of various fast growing bacteria and other micro organisms
 - Reduction of passenger infection risk
 - Smooth/textured surface
 - Wide range of colors available (AIC)
- Chemically and mechanically resistant
- Certified Flame, smoke, tox and low heat release properties (FAR/JAR/CS §25.853/ABD0031)
- Approvals: Airbus AIMS 04-08-005 and JIS Z 2801 (antimic. requirements)

Antimicrobial Surface – What does that mean?

- Special surface property of top coat reduces adherence of bacteria/micro organisms
- Immense reduction of bacteria on lavatory surfaces and wasted areas (lavatory)
- Reduction of passenger skin contamination and infections
- Increase of passenger comfort
