

## Carpet & non-electrical floor path marking

A clean and robust carpet is needed inside the cabin. Underlining the cabin look, a cabin needs to be well fitted to the cabin layout. Exact dimensions and high quality craft work is mandatory to get a positive result. We do carpets from design to delivery incl. EO/Carpet Layout.

### Product features

- Verification real dimensions on aircraft
- Re-engineering/drawings:
  - Layout drawings
  - Single parts drawings
  - Installation Engineering Order
- Carpet production
  - Material sourcing or
  - Material supply by customer
